Water Wells

Monitoring, Maintenance, Rehabilitation

Proceedings of the International
Groundwater Engineering Conference held at
Cranfield Institute of Technology, UK.

6–8 September, 1990

66/ 78654

Edited by

P. HOWSAM
Silsoe College
Cranfield Institute of Technology

Contents

Preface ix
Acknowledgements xi

PART ONE OVERVIEWS 1

1 **Boreholes and wells: their monitoring, maintenance and rehabilitation** 3
L. CLARK

2 **Well maintenance and rehabilitation in North America: an overview** 8
S.A. SMITH

PART TWO CAUSES 17

3 **Well performance deterioration: an introduction to cause processes** 19
P. HOWSAM

4 **An evaluation of the risk of microbial clogging and corrosion in boreholes** 25
D.R. CULLIMORE

5 **Influence of chemical regeneration on iron bacterial population and ochre depositis in tubewells** 35
F. BARBIČ and I. SAVIĆ

6 **Tubewell fouling at a salinity interception scheme, Wakool, NSW, Australia** 47
R.G. McLAUGHLAN and R.M. STUETZ

7 **Well deterioration in Sindh, Pakistan** 59
C.C. LEAKE and T.KAMAL

PART THREE DIAGNOSIS AND MONITORING 73

8 **Biofouling monitoring methods for preventive maintenance of water wells** 75
S.A. SMITH and O.H. TUOVINEN

9 **The use of borehole CCTV surveys** 82
T. COSGROVE

10 **Well problem identification and its importance in well rehabilitation** 87
N. MANSUY, C. NUZMAN and D.R. CULLIMORE

11 **Monitoring and prevention of iron biofouling in groundwater abstraction systems** 100
S.F. TYRREL and P. HOWSAM

12 **Diagnostic analysis of well performance data** 107
Ch. Ata-Ur-REHMAN

13 **Predicting and interpreting well behaviour and well efficiency** 114
R. HERBERT and J.A. BARKER

14 **Identifying causes for large pumped drawdowns in an alluvial wadi aquifer** 130
M.W. GROUT and K.R. RUSHTON

PART FOUR CURES 149

15 **Well performance deterioration: an introduction to cure processes** 151
P. HOWSAM

16 **Effect of acidisation on chalk boreholes** 158
D. HARKER

17 **Water well regeneration – new technology** 168
K.F. PAUL

18 **The use of high pressure water jetting as a rehabilitation technique** 180
J. FOUNTAIN and P. HOWSAM

19 **Borehole yield development techniques in an iron-rich aquifer** 195
M.J. PACKMAN

20 **Eucastream suction flow control device: an element for optimization of flow conditions in wells** 209
R. PELZER and S.A. SMITH

PART FIVE REHABILITATION IN PRACTICE 217

21 **Application of physico-chemical treatment techniques to a severely biofouled community well in Ontario, Canada** 219
J. GEHRELS and G. ALFORD

22 **A case study – rehabilitation of an iron biofouled public supply borehole, Otter Valley, South Devon, UK** 236
G.G. BOWEN

23 **A case study of screen failure and borehold rehabilitation in the lower greensand aquifer of southern England** 244
D. BANKS

24 **The alluvion river complex of the Loire, France** 261
G. GOUESBET

25 **Rehabilitation of deteriorated tubewells in Punjab scarps** 291
K.G. AHMAD

26 **Monitoring, maintenance and rehabilitation of water supply wells in India – state of art** 303
P.N. PHADTARE and G. GHOSH

27 **Village based handpump maintenance – experiences from Sri Lanka** 314
J. HETTIARACHI and S.W. ERIKSEN

28 **Rehabilitation of problem wells in Orissa Drinking Water Supply Project** 321
R. KUMAR DAW

29 **Monitoring, maintenance and rehabilitation strategies for biofouling control in water wells in Rio Negro, Argentina** 338
R.E. ALCALDE and M.A. GARIBOGLIO

30 **Rehabilitation of irrigation wells in Northern Oman – a case study**
J.A. BALDWIN 344

PART SIX ECONOMIC AND MANAGEMENT FACTORS 351

31 **Benefits of proper monitoring and maintenance**
C.G.E.M. VAN BEEK and F.A.M. HETTINGA 353

32 **Optimisation of groundwater sources**
J.E. CAMPBELL 361

33 **Rehabilitate or renew? An example in Western Zambia**
S.E. SUTTON and J.S. SUTTON 371

34 **Monitoring and diagnosis for planning borehole rehabilitation – the experience from Lima, Peru**
S. PURI and C.V. FLORES 377

35 **Rural well rehabilitation and maintenance in Welo, Ethiopia**
M.J. JONES 391

36 **The management of irrigation tubewells**
I. SMOUT 404

Index 419
