Intermediate Technology Publications

CONTENTS

1 **INTRODUCTION** **1**

Examples of Inappropriate Technology, **2**
Purpose and Organization, **4**
Summary, **6**

2 **BASIC CONSIDERATIONS** **9**

General Design Guides for Practical Water Treatment, **9**
Water Quality Criteria, **11**
Choice of Source, **16**
Choice of Treatment Processes, **17**
Construction Materials and Practices, **22**

- Concrete, **22**
- Structural Design Considerations, **26**
- Alternative Construction Materials for Small Plants, **27**
- Valves and Gates, **28**

3 **PRETREATMENT** **30**

Plain Sedimentation, **31**
Storage, **37**
Roughing Filtration, **39**

- Vertical flow roughing filters, **40**
- Horizontal flow roughing filters, **41**

Grit Removal, **45**
Control of Microorganisms, **50**

4 **CHEMICALS AND CHEMICAL FEEDING** **51**

The Jar Test, **52**
Primary Coagulants, **53**

Alum salts, **55**
Ferric salts, **56**

Alkalies for pH Control, **57**
Natural Coagulant Aids, **58**

Adsorbents-weighting agents, **59**
Natural polyelectrolytes, **59**

Disinfection, **66**

Gaseous chlorine, **68**
Hypochlorite compounds, **69**
On-site manufacture of disinfectants, **69**

Chemical Feeding, **73**

Chlorine feeding, **74**
Solution-feed chlorinators, **74**
Direct-gas feed chlorinators, **76**
Solution-type feeders, **79**
Constant-rate feeders, **79**
Proportional feeders, **81**
Saturated solution feeders, **84**
Dry-chemical feeders, **85**
Eductors, **86**

5 **HYDRAULIC RAPID MIXING** **91**

Design Criteria, **91**
Rapid Mixing Devices, **92**

Hydraulic jump mixers, **92**
Parshall flume, **93**
Palmer-Bowlus flume, **96**
Weirs, **97**
Baffled mixing chambers, **100**
Hydraulic energy dissipators, **101**
Turbulent pipe flow mixers, **101**

Application of Coagulants in Open Channels, **102**
Flow-Measurement Systems in Open Channels, **104**

6 **HYDRAULIC FLOCCULATION** **105**

Design Criteria, **106**
Baffled-channel Flocculators, **109**
Hydraulic Jet-action Flocculators, **116**
Gravel-bed Flocculators, **120**
Surface-contact Flocculators, **124**

7 **SEDIMENTATION** **126**

Horizontal-flow Sedimentation, **127**

Design criteria, **128**
Inlet arrangement, **133**
Outlet arrangement, **135**
Manual sludge removal, **137**

Inclined-Plate and Tube Settling, **139**
Upflow Sedimentation, **144**

8 **FILTRATION** **146**

Rapid Filtration, **147**

Dual-media filters, **151**
Filter bottom and underdrains, **156**
Backwashing arrangements, **159**
Auxiliary-scour wash systems, **165**
Filter Control Systems, **165**
Constant-rate Filtration, **168**
Declining-rate Filtration, **171**
Design and operation of interfilterwashing units, **173**
Direct filtration, **179**

Upflow-Downflow Filtration, **183**
Slow Sand Filtration, **190**

Design of slow sand filters, **193**
Dynamic filtration, **199**
Information sources on slow sand filtration, **202**

9 **MODULAR AND PACKAGE DESIGNS FOR STANDARDIZED WATER TREATMENT PLANTS** **203**

Package Water Treatment Plants, **205**
Modular Water Treatment Plants, **209**

10 **COSTS OF WATER TREATMENT PLANTS IN DEVELOPING COUNTRIES** **214**

The General Cost Equation, **215**
Construction Costs of Water Treatment Plants, **216**
Operation and Maintenance Costs of Water Treatment Plants, **229**
Conclusion, **231**

11 **HUMAN RESOURCES DEVELOPMENT** **232**

An Overview of Manpower Development in the Developing Countries, **235**
Classifications of Plant Personnel, **239**
Numbers of Plant Personnel, **241**
Training, **244**

APPENDIX A Common Chemicals Used in Water Treatment in the United States **246**

APPENDIX B Hydraulic Calculations for Selected Unit Processes **252**

APPENDIX C Checklist for Design of Water Treatment Processes **261**

APPENDIX D Simple Procedures for Jar Testing **265**

APPENDIX E Simplified Procedures for Water Quality Analysis **272**

APPENDIX F Individuals and Institutions Referred to in Text **277**
